Professional Summary

UX Designer and Product Owner with 5+ years leading end-to-end product design within a 25-person interdisciplinary team at Booz Allen Hamilton. Experienced in translating complex operational requirements and diverse user needs into product strategy, intuitive workflows, high-fidelity designs, and development-ready specifications for a mission-critical application. Partnered closely with users, stakeholders, and engineers to drive design decisions and ensure implementation fidelity. B.S. in Computer Science with minors in HCI and psychology; active TS/SCI.

Work History

UX Designer and Product Owner at Booz Allen Hamilton

Alexandria, VA • Jul 2021 – Present

- Led end-to-end UX strategy, information architecture, and interaction design for a classified USEUCOM application supporting mission planning, operational execution, and crisis management.
- Drove user-centered product decisions through on-site user research, stakeholder interviews, senior-leadership feedback sessions, and 10+ usability-testing sessions with 50+ users, translating insights into actionable design improvements.
- Delivered hundreds of high-fidelity screens and end-to-end task flows in Adobe XD, defining interaction states, component behavior, visual hierarchy, and detailed specifications to enable efficient, accurate implementation.
- Established a reusable design system encompassing typography, color, navigation standards, and interface components, creating interaction patterns and a scalable foundation for product development.
- Partnered with engineering through implementation and design QA, documenting visual and interaction discrepancies in pull requests and leveraging HTML/CSS expertise to troubleshoot and recommend implementation solutions.
